**Admission guidelines**
Admission to the MS-MIS program is highly competitive and based on the academic and professional credentials of the applicant pool. The College of Business generally recommends a minimum of three years of IT-related work experience, a minimum total score of 550 on the GMAT and an undergraduate GPA of at least 3.0 in the upper division coursework. However, all application materials are considered. Given the limited class size, it is likely that most who are admitted to the program will have credentials considerably above the specified minimums.
